

# MSM Masterclass

Module: **ANAL SEX, CONDOMS AND CONDOMLESS SEX**

## **Text for discussion**

*If you didn't use a condom, do you remember the reason you didn't?*

Nice and sexual, a bit of foreplay, you get kissing and get really horny on the poppers so it naturally progresses into fucking. Always fucked without with this guy. I think we met in the pub and it was just from there.

*Did you talk about HIV status – yours or his?*

Not the first time but we have spoken about it since. It just came up, but we're both negative so that was fine. I think it came up because I had a blood test. And he told me he was negative as well. Because of his job, I know he would be tested so I know I can trust him on that side as well... I'm not going to have sex with somebody who's HIV positive. I don't want to put myself at risk. Sometimes I do have unprotected sex with other guys. I know that's when I usually have had a fair amount to drink and I'm horny. Normally because I'm very horny and being top and I prefer to fuck and the horn takes over. Never get fucked myself...

*What kinds of things are you thinking when you're fucking/getting fucked without a condom?*

Just the enjoyment of it, getting high on the enjoyment of it. Sometimes if it's poppers, the poppers take over it's just the enjoyment of it. Making sure that I'm doing it right making sure that the person is enjoying it, that I'm enjoying it.

From FAQ interview with Gay man, 26-35, HIV negative.
